

# 2021 NMRC "OPEN" Tournament

Please Join Us:

Saturday Oct 30th, 2021 @ Upsala High School, in Upsala MN

The Northern Minnesota Robotics Conference will be hosting our first ever "OPEN" tournament for *FIRST* teams that geographically fall under the umbrella of FUM (*FIRST* in the Upper Midwest). This is an effort to help assist regional teams get "plays" who have had limited field time or competitions over the past 2 seasons due to the Covid-19 pandemic.

We will be playing the *FIRST* Game: "Infinite Recharge" for this event. Registration fee to participate if selected will be \$400 per team.

This event will have a fully functional field with an integrated FMS and automated scoring. The NMRC takes pride in providing high quality events with as close to a "Regional Event" atmosphere as possible.

Completing a registration application does not guarantee admittance into the event. We will be limiting the tournament to just 24 teams. Consideration will be given as well to team specific conditions such as geographic location, date of last event, attendance at other FUM related offseason events for Fall of 2021, etc.... The "Registration Application" window is scheduled to be open until at least September 3rd. However the NMRC reserves the right to alter this application window, to close sooner or stay open longer, as we see fit in order to ensure the successful operation of this event. We encourage teams interested in attending to apply as soon as possible.

Registration: <https://forms.gle/BN1Cap8RULWevXbXA>

We will be offering Lunch Options, and also have potential Hotel/Travel accommodations made available as well.

Come be a part of the fun and getting into the swing of FRC once again!
